

STI Supply air valve

STI supply air valve for wall mounting covers a wide air volume area from 5 to 70 l/s , for duct sizes 100 - 200 mm .

The valve can be quickly installed directly into the duct without a mounting ring.

STI can be installed close to the wall or off the wall. The diffusion pattern of supply air is adjusted with the two sector plates delivered with the product.

The supply air valve can be adjusted and locked to the desired position without separating the valve from duct.

Quick Selection

| Device | Air flow range I/s at sound level | | | | | |
|-----------|-----------------------------------|-------|-------|--|--|--|
| Size | 25 dB | 30 dB | 35 dB | | | |
| STI-100-C | 22 | 25 | 29 | | | |
| STI-125-C | 30 | 35 | 41 | | | |
| STI-160-C | 43 | 50 | 59 | | | |
| STI-200-C | 60 | 71 | 86 | | | |

Specifications

- CleanVent coating as standard
- Easy and quick to install.
- Quiet operation.
- Wide air volume range.
- Adjustable diffusion patterns.
- Four sizes.
- Manufactured of steel.

Diffusion pattern

Vertical

Horizontal

Throw length of chilled supply air is obtained by using the correction factor k in the following formula:

 $L_{0,2(\Delta t)} = k \times l_{0,2}$

| Δt, °C | k | h |
|--------|-----|-------------------------|
| 0 | 1,0 | 0,07 x l _{0,2} |
| -7 | 0,8 | 0,18 x l _{0,2} |

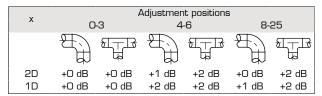

Width of diffusion pattern for different sizes at different adjustment positions is obtained by using the correction factor k2 in the formula:

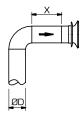

$$b = k_2 \times l_{0,2}$$

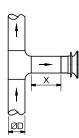

| Slot | k ₂ | |
|---------|----------------|------|
| a, mm | Ø100-Ø160 | Ø200 |
| 0 | 0,15 | 0,15 |
| 2 - 3 | 0,40 | 0,40 |
| 4 - 6 | 0,80 | 0,50 |
| 8 - 12 | 1,10 | 0,80 |
| 16 - 25 | 1,10 | 1,50 |

Sensitivity to disturbance

The table below show the effect of safety distance x and adjustment position of the valve on the noise level.

2917GB 2020.09.01

Sound data

Sound power level

| STI | Correction of sound level in dB at octave bands, middle frequency, (Hz) | | | | | | | |
|--------|---|-----|-----|-----|------|------|------|------|
| | 63 | 125 | 250 | 500 | 1000 | 2000 | 4000 | 8000 |
| 100 | 10 | -5 | -2 | -21 | 0 | -2 | -9 | -22 |
| 125 | 7 | -5 | -4 | 0 | 0 | -3 | -10 | -23 |
| 160 | 6 | -2 | -2 | 0 | 0 | -3 | -9 | -25 |
| 200 | 3 | -1 | -5 | 0 | 1 | -4 | -16 | -29 |
| Tol. ± | 6 | 3 | 2 | 2 | 2 | 2 | 2 | 3 |

Sound power levels by octave bands are obtained by adding to the total sound pressure level L_{p10A} , dB(A), the corrections K_{oct} presented in the table according to the following formula:

$$L_{Woct} = L_{p10A} + K_{oct}$$

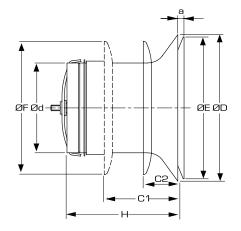

Correction K_{oct} is an average value in the range of use of

Sound attenuation

| | Sound attenuation in dB at | | | | | | | |
|--------|----------------------------|--------------------------------------|-----|-----|------|------|------|------|
| STI | | octave bands, middle frequency, (Hz) | | | | | | |
| | 63 | 125 | 250 | 500 | 1000 | 2000 | 4000 | 8000 |
| 100 | 21 | 12 | 8 | 4 | 1 | 0 | 3 | 4 |
| 125 | 19 | 11 | 9 | 3 | 2 | 2 | 5 | 6 |
| 160 | 16 | 11 | 6 | 3 | 1 | 3 | 5 | 5 |
| 200 | 14 | 9 | 4 | 2 | 2 | 4 | 4 | 5 |
| Tol. ± | 6 | 3 | 2 | 2 | 2 | 2 | 2 | 3 |

The average sound attenuation ΔL of STI from duct to room includes the end reflection of the connecting duct in wall installation.

Dimensions

General

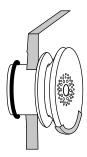

Application and Function

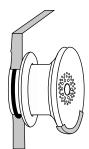

STI supply air valve (patent pending) for wall mounting covers a wide air volume area; from 5 to 70 l/s , for duct sizes 100 - 200 mm .

The product can be quickly installed directly into the duct without a mounting ring.

STI supply air valve can be installed in two ways: close to the installing surface (fig. 1) or off the surface (fig. 2). If the product is installed off the installing surface, the wall around the valve is protected against dust from the duct.

The diffusion pattern of supply air is adjusted with the sector plates (2 pcs.) delivered with the product. STI supply air valve can be measured, adjusted and locked to the desired adjustment position without separating the product from duct.

The valve body is equipped with an EPDM rubber sealing gasket. The valve can easily be adjusted to the desired position by rotating the disc. The adjustment position is secured by pushing a lock pin into the disc.

The diffusion pattern is selected by obstructing the flow of supply air downwards with the sector plates delivered with the product.

Material and surface finish

STI is made of hot-dip galvanized steel sheet.

The devices are powder coated for a high surface finish and good impact and scratch resistance.

Standard colour is white (RAL 9003). CleanVent coating as standard. Other colours are available to special order.

Instructions

Directions for installation, adjustment and care are set out in detail in our technical instruction which accompanies each product. The instruction is also accessible on www.flaktgroup.com.

Technical data and dimensioning

For complete dimensioning details, please see FläktGroup product selection program. Contact our nearest sales office for further information.
